# HOME2SCHOOL

## PURPOSE AND PHILOSOPHY

Our kindergarten through 5th grade Home2School Program is a hybrid homeschool program that allows each individual family to choose the instruction that benefits their child most, while still being a part of a larger, Christ-centered, educational community. Our program has been established to partner with families who have accepted the challenge of providing a Christ-centered home education for their children. The program provides support, assistance, guidance, and encouragement to these families.

Homeschooling is one way to meet the biblical mandate to train up children. It takes into account the gifting of the parent-teacher, the lifestyle of the family, and the needs of the individual student. VCS aims to provide the parent-teacher and the individual student with as many services and opportunities as possible to aid in the fulfillment of training a child with a solid Christian education.
